The distinguished premier designed and built Danish brand

HETA STOVE AND ACCESSORY PRICE LIST JUNE 2022 - Rev 1

Scanline 820B complete soapstone

Stoves designed today for tomorrows world meeting smoke control requirements and Ecodesign standards

THE PERFECT PEVEX AND HETA PARTNERSHIP

Pevexstoves have been long standing partners with Heta, one of the leading European stove manufacturers. Based in Lemvig, Denmark Heta have a renowned reputation for designing and building class leading modern and ultra clean stoves meeting the environmental considerations of today and tomorrow, far exceeding the latest standards of Ecodesign for woodburning stoves.

Throughout our 20+ year partnership, Pevexstoves has been instrumental in marketing and distributing the Heta brand throughout the UK making it one of the fastest growing and popular stove brands available in the UK today.

With the close cooperation that the Companies enjoy, this has resulted in many projects over the years to develop and build a wide range of stoves designed specifically for our UK marketplace. This has lead to the introduction of the ever popular Inspire range of woodburning stoves followed by the class leading Ambition stove range.......a high performance, functional, practical and a stylish addition to any room or fireplace.

For 2022 we continue to build on the success that we have created over the years adding to our range with the brand new Vista insert stove, a more comprehensive range of the 900 series, and the introduction of the balanced flue Scanline 8 gas stove.

Pevexstoves looks forward to the on-going challenges that this industry presents knowing that with the support and assistance of Heta that they are perfectly positioned to cope with this and to continue to offer our customers and stockists the first class level of service that we are known for.

Pevexstoves.....a name you can trust.

THERMASTONES FOR SCAN-LINE SERIES

OVERVIEW

Dreaming of accumulating heat from a woodburning stove over several hours? With Heta stoves your dreams come true! Depending on your choice of model, there is space for up to six thermastones, which make it possible to store heat while regulating or even shutting off convection air flow. Our thermastones are made of a special cement-based material that absorbs heat extremely effectively and then releases it slowly over a longer period of time - Perfect in combination with fast-heating Heta stoves!
