Installation

Before installing a hearth or erecting a chimney it will be necessary for you to submit building notification papers to your local authority. Building notification is made easier by the fact that both stoves and chimneys are CE-marked and meet the requirements for Swedish building regulations.

The stoves must be connected to a masonry chimney with a two-quarters surrounding wall, as the flue gas temperature is below 350 °C. If you would like further advice and instructions concerning the installation of your stove, we recommend you consult a certified chimney sweep in your area. General conditions and rules concerning distances for the installation of stoves are included in the Swedish National Board of Housing, Building and Planning's Building Regulations.

Terms of Delivery

Freight charges are applied per product to all deliveries of stoves but are capped at 5 charges per delivery. Example: a delivery of 10 units will be charged at the maximum rate of 5 x freight charge.

Freight charge per type of product:	Excl. VAT	Incl. VAT
Stove, insert, cassette or masonry stove	(£62.50)	£75.00
Shipment of 1-3 items (eg. Vermiculite set, Cast iron Base grate):	(£50)	£60
Shipment of 4-6 items or Soapstone parts:	(£100)	£120

The above listed terms of delivery only apply where there is a useable driveway to the destination. Excludes additional unloading.

DEFRA Exempt stoves for use in a Smoke Control Area
